REGISTER OF PROCUREMENT DECISIONS - WEBSITE (NHS national standard and other, subject to competitive procurement)
The CCG holds clinical and non-clinical Contract Registers which are available upon request.

INCLUSION ON SEAL REGISTER

The seal shall be used in execution of the following documents:
1. All contracts for the purchase/lease of land and/or building;
2. All contracts for capital works exceeding £100,000;
3. All lease agreements where the annual lease charge exceeds £10,000 pa and the period of the lease extends beyond five years;
4. Any other lease agreement where the total payable under the lease exceeds £100,000;
5. Any contract or agreement with organisations other than NHS or other public bodies where the annual costs are expected to exceed £100,000.

2	Community Stroke Support Services	Community Stroke Support Services for the County are delivered by Buckinghamshire Healthcare Trust (BHT) and the Stroke Association (SA). BHT provide the 0 - 6 months support in the South of the county (funded through the community block contract) and the SA provide 0 – 6 months in the North and 6months + support in the South and in the North. The SA element of the service has been funded through the Better Care Fund (BCF) at an annual value of £140,276.00 per annum. The Stroke Association contract is with BCC and expires on the 31st August 2016. On this basis, only a part year allocation was made for Community Stroke Support in the 2016/17 BCF. A comprehensive commissioning review was requested and received by the Adult Joint Executive Team (JET). The JET agreed the recommendation for a clinically led, integrated, county-wide model of care. The current providers (BHT and SA) and other stakeholders were fully involved in the commissioning review. 3	General medical services - Mandeville Practice; APMS contract between NHS England and the Practice U Surgeries for the provision of general medical services to the patients at Mandeville Practice, Aylesbury, Bucks.	Practice U Surgeries Limited Group was awarded an interim APMS contract for the provision of services at the Mandeville Practice following resignation by the previous contract holders in October 2015. The interim contract term offered was 12 months starting 1st April 2016, with an option to extend for a further 6 months. By the very nature of how this service was procured using a standard APMS contract and a shortened process to meet the deadline to get a service in place, this interim solution did not meet the full needs of the local population and further work was expected to procure a longer term contract which responds to both the health needs of this population and the principles of innovation seen in many of the new models of care. Original Procurement Plans: Following the successful mobilisation of the service by the required deadline, Aylesbury Vale CCG under delegated commissioning arrangements, started working with the CSU procurement team to progress a second procurement in order to ensure the tender and service mobilisation was completed by 1st April 2017.	Existing contract re-procured - as detailed in column C	Single Tender Waiver	n/a	Alan Cadman, Deputy CFO	Aylesbury Vale CCG and Chiltern CCG Governing Bodies Audit Committees meetings in common	https://www.buckinghamshireccg.nhs.uk/public/about-us/how-we-are-doing/governing-body-meetings/		The Practice U Surgeries Ltd	Rose House Bell Lane Little Chalfont Amersham HP6 6FA	£1,091,141.76	n/a	None	n/a	n/a	Contract Awarded	Primary Care	APMS	n/a	12 months	6 months	Single Tender Waiver	n/a	n/a	28/09/2016	n/a	01/04/2016	31/03/2017	Contract award date given is the date when the procurement decision was confirmed by the relevant committee that has agreed it
4	Deployment of Digital IT Platform to enable Primary Care Transformation in AVCCG	The expenditure involved in this purchase is over £5,000 (Net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: The rationale for not completing a full procurement exercise is that Digital Life Sciences (DLS) are the digital IT provider delivering Modality Partnership's digital platform on which the Business Case and benefits are based and agreed. DLS have a track record of successful project management and delivery of a digital platform in primary Care to deliver the exact requirements for AVCCG, therefore they are the best placed organisation to deliver this piece of work and the only supplier on the market that can deliver against business case. 5	Deployment of Care Home Telemedicine Solution (Airedale Vanguard)	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: the rationale for not completing a full procurement exercise is that Immedicare LLP in partnership with Airedale Foundation Trust are the only provider on the market that can supply 24/7 solutions to care homes. They have a proven track record of successful project management and delivery in telemedicine solutions to care homes. Therefore they are the best placed organisation to deliver this piece of work. 6	Project Management Support	This is a specific yet and varied role, with the post holder working as the Digital Operational Lead within the New Models of Care work stream for the CCG. The role encompasses both a future facing strategic development element, harnessing innovation and creativity from our Transformation Team and Member practices as well as a traditional project management role to deliver a number of internal and external major transformation projects which may on occasions include the development and delivery of tenders and new service opportunities. The post holder ideally has a background of working within the NHS, primarily within Primary Care with extensive EMIS Web knowledge and experience and a variety of other clinical systems. The individual will need to be ambitious with a proven capability to lead, inspire and motivate others. As our Digital Operations Lead, they will need to be able to think strategically and yet make things happen on the ground, delivering the highest quality to tight deadlines. Supports a number of externally funded programmes including Airedale, DLS and EoS which attracts Quality Premium funding for the CCG. 7	Programme Lead for commissioning support	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: the supplier is on the procurement framework for supply of short term agency resource to cover this interim post. The supplier is the only one who can supply the specialist knowledge and support to assist with this piece of work on the CCG restructuring. This is via a framework so the supplier is pre-agreed. CVs were received as part of the process. 8	GP Practice Wi-Fi connections	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: The SCWCSU Procurement Team have confirmed that this is on the the GPSoc Framework (GP Systems of Choice provides a contractual framework to supply IT systems/services to GP practices and associated organisations in England). No formal tender process is required as there are no other suppliers on the framework who can offer the same solution. 9	Quality Improvement Programme Manager	• was recruited to delivery 3 projects o Health and housing o Equip implementation o MCA Assess right tool • The Executive Team approved resource for a quality improvement lead to support quality delivery while the CSU had issues with their performance. A Quality Improvement Lead was recruited but then left after 3 months. • The health and housing project has taken longer than anticipated due to delays in social care data feed. This has had an impact on the timeline of the project. This has meant x for some of his role had capacity at a time when we lost the additional resource to support quality delivery. • There was additionally a gap in resource of a day a week in an Emergency Planning Officer role at a time when EPRR was to go through an assurance process with the Area Team. June-Sept. • We therefore took the decision to utilise x's additional capacity not being sed while we waited for the health and housing and not recruit to another quality post to support delivery. This would extend his contract – mainly due to the delay in housing but we would be utilising his wider skills to support delivery within the team. • This support continues to be required because o There is a change in leadership within quality and proposed changes in structure means there is a time of instability and to manage some of the risks this carries Russell will offer continuity of delivery of key pieces of work while also delivering on his project work. o This also comes at a time when there is a significant increase in activity within the CCG linked with contracting. • It is anticipated The Capacity from x will be needed until end of January 2016	New procurement	Single Tender Waiver	n/a	Alison Foster	Aylesbury Vale CCG and Chiltern CCG Governing Bodies Audit Committees meetings in common	https://www.buckinghamshireccg.nhs.uk/public/about-us/how-we-are-doing/governing-body-meetings/		C4H Resourcing (Commissioning for Health)	35 Jack Close, Chandler's Ford, Eastleigh, Hampshire, SO53 4NU	£58,213.51	n/a	n/a	None	n/a	STW agreed	Commissioning Services	Employment	n/a	3 months	n/a	Single Tender Waiver	n/a	n/a	16/10/2015	27/07/2016	01/10/2015	31/01/2016	Contract award date given is the date when Single Tender Waiver application was signed by the Chief Finance Officer. 10	End of Life/Palliative care contracts	End of life and palliative care services in Buckinghamshire are delivered by eight different providers across the county. As well as the community and in-patient services delivered by Buckinghamshire Healthcare Trust (with the support of the Florence Nightingale Charity) there are a variety of voluntary sector organisations that are commissioned and utilised dependent upon the need of the population and relative geographical location of the patient. The service as a whole provides the following: • In-patient palliative care and respite beds Lymphedema Care • Specialist community palliative and end of life care • Walking night services • Day Hospice Services • Palliative Care team into the acute setting • Single point of access for referrals All contracts as documented above are due to expire at the end of March 2017.	Existing	Single Tender Waiver	Debbie Richards, Director of Commissioning and Delivery	Philip Murray, Chief Finance Officer	Aylesbury Vale CCG and Chiltern CCG Governing Bodies Audit Committees meetings in common	https://www.buckinghamshireccg.nhs.uk/public/about-us/how-we-are-doing/governing-body-meetings/	Audit Committee minutes 01/02/2017: An STW was presented to cover a number of existing end of life/palliative care contracts. PM noted that the original request from relevant commissioners was for extensions for a further 2 years, but had been agreed and signed by the CFO for 1 year to March 2018. This was to facilitate further work for the 2nd year in market development and ensuring value for money in a controlled manner given a heavy subsidy from the charitable sector. Philip Murray (CFO) noted that that, although this work could be externally tendered, there is no precedent and high risk associated with it in terms of potential loss of charitable contribution. Hence the single tender waiver rather than other alternative procurement method. Tony Dixon (Audit Chair, Chiltern CCG) queried whether there was sufficient time for this work to be completed. PM replied that a full tender approach would need to launch mid-year to keep to timescale; if we were to take a full tender approach. However, LP added that what we were seeking is a collaborative alliance from the charitable sector to ensure their role is not lost, and to further develop this over the next year at which point the agreed 1 year extension would be subject to further review. TD suggested a timeline makes clear our expectations.	• Sue Ryder Hospice Care - £525,000: Part block part spot purchase (inpatient beds) Joyce Grove, Nettlebed Henley-on-Thames Oxfordshire RG9 5DF • Thames Hospice Care – £175,292: Spot purchase contract (inpatient beds) Pine Lodge, Hatch Lane Windsor SL4 3RW • Rennie Grove hospice at home - £436,375: Block Contract (community care) Hodgemoor View, Three Households, Chalfont St Giles • Hospice of St Francis - £130,970: Spot Purchase Contract (inpatient beds) Spring Garden Lane, Off Shootersway, Berkhamsted, Herts, HP4 3GW • South Bucks Hospice - £66,500: Block Contract (lymphedema care) Pulsey House, 9a Amersham Road, High Wycombe, Buckinghamshire, HP13 6PN • Marie Curie - £101,000: Block Contract (Night sitting service) C/O Unit 9G Mobbs Miller House, Ardington Road, Northampton, NN1 5LP	Various as listed	£1,235,637 (annual)	n/a	None identified	n/a	n/a	STW agreed	Commissioning Services	National standard - short form	n/a	1 year	n/a	Single Tender Waiver	n/a	n/a	19/01/2017	01/02/2017	01/04/2017	31/03/2018	Contract award date given is the date when Single Tender Waiver application was signed by the Chief Finance Officer. 11	Any Qualified Provider (AQP); CHC Adult Domiciliary Care	Adult Domiciliary Care, Children and Young People Domiciliary Care and Care Home Services in Buckinghamshire are not currently purchased through contracts as all activity is contracted on a "spot purchase" basis. Whilst this appears to be common practice in some parts of the country, it means that a price has to be "negotiated" for every placement and there is variability in prices charged especially as there is an identified shortage of suppliers in some segments of the market. Both CCGs previously approved the recommendation that AGEM conducts a competitive procurement exercise as an agent on behalf of the Buckinghamshire CCGs to put in place contracts for CHC covering domiciliary care services. 14	Additional licences for the Vertis System to enable support at STP level	The supplier, TMI, is the current supplier to the CCG to provide the PMO (Project Management Office) solution. The solution is now being rolled out to provide support for STP (Sustainable Transformation Plan) level projects. In order for the CCG to be able to use this platform for STP projects it required a substantial increase in the number of licences we would need to hold. This Purchase Order is for the purchase of an additional 700 licenses along with a separate STP level site – The annual support & hosting costs will replace the annual support & hosting costs of our original Verto purchase as this is based on the number of licenses that are held. 19	Temporary clinical assessment of continuing healthcare applications	The current contract for continuing healthcare provision with AGEM will be coming to an end on 4th December. In the interim however they are struggling to continue to meet its contracted dates. A new provider OHFT will take the full service contract from 4th December and will start transitioning from 9th October at which time it will manage new referrals into the service. A rapid, short term solution is required to ensure sufficient temporary capacity to cover this transitional period between providers safely. The temporary contractors to be approved through the STW will be responsible for undertaking the review and the clinical assessment of Continuing Healthcare clients and support packages provided. **Justification for single tender waiver:** The continuing healthcare market is very niche and there are few providers with the skills and experience to deliver services effectively, within a reasonable geography and at such short notice. In particular the team at Unified Health & Care have the necessary skill set to perform the clinical assessment for packages of care provided to Continuing Healthcare clients. They are also able to mobilise quickly which will prevent any further procurement of inappropriate packages of care and the associated cost. This may be of financial benefit to the CCG. Unified Health & Care will work alongside the current provider and the new provider throughout the transition period providing continuity and the transfer of skills and process to this challenging area of healthcare provision. 20	High intensity users programme	In October Buckinghamshire CCGs were awarded NHSE monies to deliver a high intensity users programme. This programme is expected to be implemented by November so that benefits can be realised throughout the winter. The programme involves three localities all of which will have a tailored service to their population health needs, sharing core elements where possible. The urgent care team is not at full capacity at present. In order to deliver as per our commitment to NHSE and maximise the potential impact to A&E through winter an Urgent Care Programme Manager is considered necessary to ensure delivery to this and other urgent care initiatives. The contract for which the STW is required is for the human resource necessary to make this happen. 21	24/7 Primary Care Access	Out of Hours and Minor Injury and Illness Unit (MIIU) at Wycombe Hospital. The contracts for the provision of General Practice Out of Hours (OOH) service and the Minor Injury and Illness Unit (MIIU) service at Wycombe General Hospital will both come to an end in March 2018, meaning there is an opportunity to redevelop services for a further term in accordance with local population health needs. The replacement offer has been called the 24/7Primary Care Access Services. It is recognised that the current service provision for GP OOHs and the MIIU are based on historic and out-dated stand-alone contracts, where providers have worked in silos from other services. The CCGs intend to align service delivery across the whole 24/7 period so that routine and urgent primary care becomes seamless and patients find it easier to access the care they need at the right time and in the right place. This will also require significant transformation in community services and changes in the ways of working and relationships between primary, community and secondary care and the care sector. In order to drive this change, the CCGs were specifically looking for applications for the 24/7 Primary Care Access services where a range of providers have agreed to collaborate so that a truly seamless service, with potential to be fully integrated with community services, can be commissioned and improve outcomes for the local population. The value of 24/7 Primary Care Access service is £5.688m annually. The initial 5 year period will commence from 9th April 2018, with possible extension of up to an additional 5 years. Since NHS Buckinghamshire Healthcare Trust (BHT) is an existing holder of an NHS contract of £255m with the CCGs, the route for enacting this recommendation would be to vary the existing contract to incorporate these additional 24/7 Primary Care Access services of £5.688m. 22	Mandeville Practice Contract	This procurement was undertaken for a future provider to run the Mandeville Primary Care Practice, Hannon Road, Aylesbury HP21 8TR from 1 April 2018. The Service is a healthcare service falling within Schedule 3 to the Public Contracts Regulations 2015 ("the Regulations"). It is therefore not subject to the full regime of the Regulations, but instead governed by the "Light Touch Regime" contained within Chapter 3, Section 7 of the Regulations (Regulations 74 to 77). The Light Touch Regime is a specific set of rules for certain service contracts (over £589,148) that tend to be of lower interest to cross-border (i.e. EU-wide) competition, and allow contracting authorities more flexibility in their approach to the procurement process than under the full regime. Although there will be some change in those running the practice, the services patients currently receive from The Mandeville Practice will continue. Patients do not need to re-register or do anything differently; services will continue to be provided as usual and will be transferred seamlessly to the new provider on 1 April 2018. 23	Direct Awards Scheme	Direct Awards are enhanced services (in additional to contracted GMS services) commissioned locally dependent on local needs which are delivered by Primary Care. These services are voluntary and are commissioned by both CCGs. The proposal accepted and adopted had been submitted to Primary Care Commissioning Committee (PCCC) on the 7th December 2017 for consideration and recommendation to Governing Body. This led to recommendation of a Direct Award bundle to be adopted across both CCGs. 30	Improved Access to General Practice: APMS Contract Approval	In line with the national commitment to deliver seven day services, Buckinghamshire CCG is required to commission improved access to general practice by 1st October 2018. The overarching principle of this initiative is to improve access to routine, bookable appointments in general practice so that patients find it easier to visit the GP at a time that fits in with daily life. The key components of this service are nationally mandated as follows: • Capacity – 30 minutes per 1,000 weighted population rising to 45 minutes as indicated by need. • Timing – Weekday evenings until 8pm and availability of appointments at weekends based on patient need. • Advertising – the service will be widely advertised but must include practice websites. • Measurement – use of nationally commissioned tool (still in development). • Digital – use of digital approaches to offer a range of consultation types. • Inequalities – service model addresses identified local need. • Effective access to wider whole system – ensuring access from and to other primary care and GP services (e.g. links with NHS 111). 34	The contract is for the supply of Adult Continuing Healthcare and Children's Continuing Care clinical services	These services are currently provided by Oxford Health Foundation Trust (OHFT) in both Oxfordshire and Buckinghamshire together with brokerage and contract management of suppliers. However, the aim is that brokerage and contracting in Buckinghamshire will be integrated with Buckinghamshire County Council from April 2019, and with Oxfordshire County Council in Oxfordshire. The remaining Adult CHC and Children's CC clinical services across both Buckinghamshire and Oxfordshire will be delivered by one integrated service working across both counties. 35	CHC contract award 2017-19	In May 2017 Executive Committee approved the option of transferring the CHC service to Oxford Health Foundation Trust (OHFT) in 2017 to provide a step in service. This was due to the previous provider giving premature notice on the contract. Executive Committee also approved delegation of responsibility to the Director of Commissioning and Delivery to agree transitional arrangements with OHFT, BHT and BCC. On a number of occasions the Governing Body has also been informed of progress. Subsequently, following CSU procurement team advice, the Provider market were informed of this intention via a Prior Identification Notice (PIN) and no other organisation expressed an interest in delivering the service. A Single Tender Waiver signed by the Chief Finance Officer was not brought to CCG Audit Committee at that time due to not having agreed a contract value with OHFT. The work to stabilise the CHC service has taken longer than anticipated as has agreeing a contract with OHFT due to the complexity of the service user needs and legacy issues. Governing Body (January 2018) and Executive Committee (February 2018) have been updated on current plans to integrate CHC brokerage with BCC and undertake a procurement for adult CHC and children's continuing care clinical assessment services across both Buckinghamshire and Oxfordshire. The latest timeline for this is that it will lead to the new clinical assessment service being in place from April 2020. This will allow OCCG time to undertake work to improve brokerage in Oxfordshire. Benchmarking with our peers undertaken by NHSE indicates the existing CHC team are smaller than expected for the size of the caseload and so providing good value for money. BCCG and OHFT are now in a position to agree the contract for the step in services from December 2017 to March 2019 at a core value of £1,604,804 pa. 36	Contract Extension – Buckinghamshire Children and Young Peoples Integrated Therapies Service	Agreement of 2 year allowable extension to contract to from 1st April 2020 - 31 March 2022. The Buckinghamshire Children and Young Peoples Integrated Therapies Service (ITS) was commissioned from 1 April 2017 for 3 years (until 31 March 2020). The Integrated Therapies Service commenced on 1 April 2017 to provide an integrated therapies service to children and young people. The service is provided by Buckinghamshire Healthcare NHS Trust (BHT) and is jointly commissioned between Buckinghamshire County Council and Buckinghamshire Clinical Commissioning Group. Current funding totals £11,347,299 for the 3 year period. An extension would provide an opportunity to renegotiate the contract in order to develop the service's contribution to a number of initiatives that have emerged since the original commission. For example, the Buckinghamshire County Council SEND Strategy (2017-20), NHS Long Term Plan and the Buckinghamshire Integrated Care System. Additionally, when the current service was commissioned, research showed that where other similar services had integrated, this took up to 3 years to embed. An extension would provide an opportunity for further consolidation and more innovation within the integrated model. If Buckinghamshire County Council/CCG did nothing, the contract would end and there would be no contracted provision to meet the needs of children and young people. The Council and the CCG would not be able to evidence that they are meeting Statutory Duties, in particular the Special Educational Needs and Disability Code of Practice 0 to 25 years (2014), and the Childrens and Families Act (2014). Additionally, there would not be early intervention provision resulting in increased demand on both Council statutory services and NHS primary care. It would be unsettling to commence a recommissioning process in year 3 of the current contract whilst the service is still embedding changes. This would be likely to result in reduced progress during year 3. Research at the time of the current commission indicated that a fully integrated service takes up to 3 years to embed, so the system would not be allowed the opportunity to fully realise the benefits of the integrated service. The service changes and outcomes demonstrated to date has provided confidence in the provider's ability to deliver the benefits and potential for further developments over the next 2 years.

39	Clarity TeamNet	Clarity TeamNet (https://clarity.co.uk/teamnet) has been identified as the digital tool to enable the partnership development and collaboration between newly formed PCNs across Buckinghamshire. Clarity TeamNet provides a powerful and secure platform that includes all the tools for collaborative working designed to meet the complex and overlapping environment in Primary Care. Clarity TeamNet will be procured for a period of 2 years. It provides a common platform for PCNs to share meeting minutes, action and decision logs and use TeamNet's project management tool to facilitate the process of collaboration and sharing across and within PCNs. As policies, protocols or guidance can change quickly in the NHS; Bucks CCG via Clarity TeamNet will be able to have direct and focused communications with the right people as well as keep track of the changes. Significant time efficiency will be created as it reduces reliance on outdated email distribution lists. Clarity TeamNet also has specialist tools such as risk management tools and the ability to request and collate submissions and questionnaires from practices which will assist Buckinghamshire CCG in the review and evaluation of projects. Clarity TeamNet portal for individual practices is also high as it helps save time, manage practice effectively and ease the path through CQC and other compliance inspections. 44	Covid 19- Innredicare LLP	Innredicare LLP currently provides 24 hour telemedicine support to 37 care homes across Buckinghamshire . In response to the demands of the current environment created by COVID19, Bucks CCG are proposing to extend the contract with Innredicare LLP initially with 33 care homes and then rollout to 82 further which would ensure coverage across all care homes and supported living homes within Buckinghamshire. This will help in the provision of 24 hour clinical support and management into all care homes as a direct response to COVID 19. Current cost of service for 37 homes is £245,880 for 12 months. It is proposed to commission • Further 33 homes at a cost of £155,467 for 12 months • Remaining 82 care homes and 20 (82 in total) supported living homes at a cost of £498,534 for 12 months The service provision comprises: • Fully managed digital care service including o Laptop, HD Webcam, carrycase o Installation services, technical & clinical training o Telephone & video helpdesk support o Comprehensive SLA including on-site engineering visits. • Clinical Call Service - 8 clinical consultations per month, which could be aggregated across all operational care homes as required. The service is expected to: - Reduce ambulance conveyances and A&E attendance rates and - Reduce acute hospital admissions This is essential during Covid and beyond. The total cost of innredicare supporting 152 homes (care homes and supported living) for 12 months would then be £899,881 – of which £654,001 is being requested here.
