2	Community Stroke Support Services	Community Stroke Support Services for the County are delivered by Buckinghamshire Healthcare Trust (BHT) and the Stroke Association (SA). BHT provide the 0 - 6 months support in the South of the county (funded through the Commissioning for Quality and Innovation (CQUIN) framework) and 6 months support in the South and in the North. The SA element of the service has been funded through the Better Care Fund (BCF) at an annual value of £146,276.00 per annum. The Stroke Association contract is with BCC and expires on the 31st August 2016. On this basis, only a part year allocation was made for Community Stroke Support in the 2016/17 BCF. A comprehensive commissioning review was requested and received by the Adult Joint Executive Team (JET). The JET agreed the recommendation for a clinically led, integrated, Stroke Support Service. The current providers (BHT and SA) and other stakeholders were fully involved in the commissioning review. The final report has been made available to both. 3	General medical services - Mandeville Practice - GMS Contract between NHS England and the Mandeville Practice for the provision of general medical services to patients at Mandeville Practice, Aylesbury, Bucks.	Practice in bargaines contract Group was awarded an interim APMS contract for the provision of services at the Mandeville Practice following resignation by the previous contract holders in 2015. The interim contract was awarded for 12 months starting 1st April 2016, with an option to extend for a further 6 months. By the very nature of how this service was procured using a standard APMS contract and a direct award process, it was never going to be a long term solution. It was to be a short term fix to meet the full needs of the local population and further work was expected to procure a longer term contract which responds to both the health needs of this population and the principles of the Buckinghamshire Five Year Forward View. The Mandeville Practice was integral to the successful mobilisation of the service by the required deadline. Aylesbury Vale CCG under delegated commissioning arrangements, started working with the CSU procurement team to progress a second procurement in order to ensure the tender and service mobilisation was completed by 1st April 2017.	Existing contract re-procured - as detailed in column C. 4	Deployment of Digital IT Platform to enable Digital Care Transformation in AVCCG	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: The AVCCG is completing a full procurement exercise to that England Life Sciences (ELS) are the digital IT provider delivering Midaddy Partnership's digital platform on which the Business Case and Digital Care Pathways are delivered. The ELS digital platform is a unique combination of software and delivery of a digital platform. In primary Care to deliver the exact requirements for AVCCG, therefore they are the best placed organisation to deliver this piece of work and the only supplier on the market that can deliver against business case. 5	Deployment of Care Home Telehealth/Telecare (Ameliate Vanguard)	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: The AVCCG is completing a full procurement exercise to that Ironbridge LLP in partnership with Ainslies Foundation Trust are the only provider on the market that can supply 24/7 solutions to care homes. The AVCCG are the only organisation that can deliver the integrated pathway and telemedicine solutions to care homes. Therefore they are the best placed organisation to deliver this piece of work. 6	Project Management Support	This is a specific, yet and varied role, with the post holder working as the Digital Operational Lead within the New Models of Care work stream for the CCG. The role encompasses both a BAU and Transformation element and therefore requires someone who can work in the Transformation Team and Attention practices as well as a traditional project management role to deliver a number of internal and external major transformation projects which may on occasion be of a complex and contentious nature. The post holder will be responsible for the post holder will also have a background of working within the NHS, primary care/Primary Care with extensive GMS Web knowledge and experience and a variety of other clinical systems. The individual will need to be ambitious with a proven capability to lead, inspire and motivate others. As our Digital Operations Lead, they will need to be able to think strategically and to work with a wide range of partners to deliver the digital agenda in primary care. Supports a number of externally funded programmes including Ameliate, DLS and ICS which attracts Quality Premium funding for the CCG. 7	Programme Lead for commissioning support	The expenditure involved in this purchase is over £5,000 (net of VAT) and should therefore be the subject of competitive quotations. However, in accordance with Standing Orders it is requested that this requirement be waived for the following reasons: The AVCCG is on a procurement framework for supply of short term agency resource to cover this interim post. The supplier is the only one who can supply the specialist knowledge and support to assist with the take place of work in the CCG restructuring. This is via a framework so the supplier is pre agreed. 9	Quality Improvement Programme Manager	4 week recruited to delivery 3 projects 1 Health and housing 2 Equip implementation 3 MCA Access right now - The Executive Team approved resource for a quality improvement lead to support quality delivery within the CSU that issues with their performance. A Quality Improvement Lead was recruited but then left after 3 months. - The CSU has experienced much slower longer than anticipated due to delays in social care data feed. This has had an impact on the timeline of the project. This has meant is for some of his role had capacity at a time when we lost the additional resource to support quality delivery. This has meant that the Executive Team have had to prioritise quality delivery on one site at a time when EPRR was to go through an assurance process with the Area Team. Jones Site - We therefore took the decision to utilise c's additional capacity not being met while we waited for the health and housing and not recruit to another quality post to support delivery. This would extend his contract – mainly due to the delays in having but we would be utilising his wider skills to support the delivery of projects. - This support continues to be required because: 1.There is a change in leadership within quality and proposed changes in structure means that the quality improvement lead will be required to support the CSU in this area and will offer continuity of delivery of key pieces of work while also delivering on his project work. 2.This also comes at a time when there is a significant increase in activity within the CCG linked with contracting. - It is anticipated The Capacity from c will be needed until end of January 2016	New procurement	Single Tender Waiver	n/a	Alison Foster	Aylesbury Vale CCG and Chiltern CCG Governing Bodies Audit Committees meetings in common		https://www.buckinghamshire.gov.uk/media/documents/about-us/governance/governing-body-meetings/	CAH Resourcing (Commissioning for Health)	55 Jack Clarke, Chandler's Ford, Eastleigh, Hampshire, SO53 4NU	£58,213.01	n/a	n/a	None	n/a	£75K agreed	Commissioning Services	Employment	n/a	9 months	n/a	Single Tender Waiver	n/a	n/a	16/10/2015	27/07/2016	01/10/2015	27/01/2016	Contract award date given is the date when Single Tender Waiver application was signed by the Chief Finance Officer. 10	End of Life/Palliative care contracts	End of life and palliative care services in Buckinghamshire are delivered by eight different providers across the county. As well as the community and inpatient services delivered by Buckinghamshire Healthcare Trust (with the support of the Florence Nightingale Charity) there are a variety of voluntary sector organisations that are commissioned and utilised dependent upon the need of the population and relative geographical location of the patient. The service is made up of the following elements: 9 funded palliative care and respite beds Lymphedema Care Hospital at home for palliative and end of life care - Sitting night services - Day Hospice Services - Single point of access into the acute setting - Single point of access for referrals All contracts as documented above are due to expire at the end of March 2017.	Existing	Single Tender Waiver	Debbie Richards, Director of Commissioning and Delivery	Philip Murray, Chief Finance Officer	Aylesbury Vale CCG and Chiltern CCG Governing Bodies Audit Committees meetings in common	Audit Committee minutes 01/03/2017. At STW was presented to cover a number of existing end of life/palliative care contracts. PM noted that the original request from relevant commissioners was for extensions for a further 2 years, but had been agreed and signed by the CFO for 1 year. PM noted that 1 year was the minimum time for the first year in market development and ensuring value for money in a controlled manner given a heavy subsidy from the Charitable Funds. PM noted that the 1 year extension (although the work could be externally tendered) there is no precedent and high risk associated with it in terms of challenge. PM noted that the proposal was for a single tender waiver rather than other alternative procurement method. Tony Davis (Audit Chair, Chiltern CCG) queried whether there was sufficient time for this work to be completed. PM replied that a full tender approach would take 6 months and there was a risk that we may not be able to take a full tender approach. However, LP added that what we were seeking is a collaborative alliance from the charitable sector, and that we may be able to extend the current delivery this over the next year at which point the agreed 1 year extension would be subject to further review. TD suggested a timeline makes clear our expectations.	https://www.buckinghamshire.gov.uk/media/documents/about-us/governance/governing-body-meetings/	• Sue Ryder Hospice Care - £520,000 Part block part spot purchase (inpatient beds) Sue Ryder Leighton Hospice, Leighton Buzzard, Bedfordshire MK45 5EP • Thames Hospice Care - £175,282 Spot Purchase Contract (inpatient beds) Pine Lodge, Hatch Lane Windsor SL4 3RW • Rennie Grove hospice at home - £436,270 Spot Purchase Contract (Hospice at Home) Hedgemoor View, Three Households, Chalfont St Giles • Hospice of St Francis - £130,070. 11	Any Qualified Provider (AQP) CHC Adult Domiciliary Care	Adult Domiciliary Care, Children and Young People Domiciliary Care and Care Home Services in Buckinghamshire are not currently purchased through contracts as all activity is contracted on an individual basis. Due to the nature of the services and the current model of the local country, it means that a price has to be "negotiated" for every placement and there is variability in prices charged especially as there is an identified shortage of suppliers in some segments of the market. The CCG has a statutory duty to ensure compliance with the Regulations that ASCEN conducts an appropriate procurement exercise as an agent on behalf of the Buckinghamshire CCGs to put in place contracts for CHC covering domiciliary care services. 19	Temporary clinical assessment of continuing healthcare applications	The current contract for continuing healthcare provision with ASDAN will be coming to an end on 4th December. In the interim, however the service is struggling to continue to meet its contractual obligations. The CCG is therefore in the process of ending the current contract and will start transitioning from 5th October at which time it will manage new referrals into the service. A rapid, short term solution is required to ensure sufficient temporary capacity to meet the CCG's statutory responsibilities. A business case for this proposal will be approved through the ETW will be responsible for undertaking the review and the clinical assessment of Continuing Healthcare clients and support packages provided. **Justification for single tender waiver:** The continuing healthcare market is very niche and there are few providers with the skills and experience to deliver services effectively, within 2-3 weeks of contract award and to the quality that is required by the CCG. Oxford Health & Care have the necessary skill set to perform the clinical assessment for packages of care provided to Continuing Healthcare clients. They are also able to mobilise quickly which will prevent any further procurement of inappropriate packages of care and the associated cost. This may be of financial benefit to the CCG. Oxford Health & Care will work alongside the current provider for a short period to ensure continuity of service provision for patients and the transfer of skills and process to this challenging area of healthcare provision. 20	High intensity users programme	In October Buckinghamshire CCGs were awarded NHSE monies to deliver a high intensity users programme. This programme is expected to be implemented by November so that CCGs can start to realise benefits in the 2018/19 financial year. The overall objective of which will have a tailored service to their population health needs, sharing core elements where possible. The urgent care team is not at full capacity at present. In order to deliver so that the programme can be delivered in a timely manner the CCG's Urgent & Emergency Care Programme Manager is considered necessary to ensure delivery to this and other urgent care initiatives. The contract for which the STW is required is for the human resource necessary to make this happen. 21	24/7 Primary Care Access	Out of hours and Minor Injury and Illness (4/4 (MMI)) at Wycombe hospital. The contracts for the provision of General Practice Out of Hours (OOH) service and the Minor Injury and Illness Unit (MIU) service at Wycombe General Hospital will both come to an end in March 2018. Commissioners have undertaken a review of the current OOH and MIU services to ensure local population health needs. The replacement offer has been called the 24/7Primary Care Access Services. It is recognised that the current service provision for GP OOHs and the MIUs are based on historic and out-dated stand-alone contracts, where providers have worked in silos from other local services. The CCGs are keen to ensure that the new 24/7 Primary Care Access service is routine and urgent primary care becomes seamless and patients find it easier to access the care they need at the right time and in the right place. This will also require significant improvements in the interfaces and pathways for patients to move in a timely manner between primary, community and secondary care and the care sector. In order to drive this change, the CCGs were specifically looking for applications for the 24/7 Primary Care Access service where a range of providers have agreed to collaborate so that a truly seamless service, with potential to be fully integrated with community services, can be commissioned and improve outcomes for the local population. The value of 24/7 Primary Care Access service is £5,688m annually. The initial 5 year period will be awarded to the successful provider(s) through the Bucks Provider Collaborative. Since NHS Buckinghamshire Healthcare Trust (BHT) is an existing holder of an NHS contract of £220m with the CCGs, the route for erlecting this recommendation would be to vary the existing contract to incorporate these additional 24/7 Primary Care Access services of £5,688m. 22	Westcastle Practice Contract	The procurement was undertaken for a future provider to run the Westcastle Primary Care Practice, Hanson Road, Aylesbury HP20 1ER from 1 April 2018. The Service is a healthcare service falling within Schedule 3 to the Public Contracts Regulations 2015 ("the Regulations"). As it therefore not subject to the full regime of the Regulations, but instead governed by the "Light Touch Regime" contained within Chapter 3, Section 7 of the Regulations (Regulations 74 to 77). The Light Touch Regime is a specific set of rules for certain service contracts (over £589,148) that tends to be of lower interest to cross border trade. The Light Touch Regime allows greater flexibility than the more flexibility in their approach to the procurement process than under the full regime. Although there will be some change in those running the practice, the services patients currently receive from The Westcastle Practice will continue. Patients do not need to re-register or do anything differently; services will continue to be provided as usual and will be transferred seamlessly to the new provider on 1 April 2018. As on this occasion, they were not asked to leave without prior to a decision as it is already in the public domain. The Clinical Chair will hand over the chair of the meeting to the deputy chair for this item. As regards engagement with member practices on the details of the scheme in the run up to the requested recommendations, clinical commissioning leads who are also member GPs and partners in practices who would benefit financially were engaged. This was solely for the purpose of obtaining their suggestions as to potential inclusions within the scheme, with the subsequent recommendations detailed in the paper coming from CCG commissioners who are not financially conflicted with the decision requested.	Although not participating in any discussion, they are free to remain present and are reminded of confidentiality along with all other members present. This is on the basis that the preferred bidder has a 10 day standstill period during after governing body ratifies the recommendation, after which the contract award will be announced publicly if sufficient assurances as to the due process followed are received. 30	Improved Access to Primary Care Service APMS Contract Approval	In line with the national commitment to deliver seven day services, Buckinghamshire CCG is required to commission improved access to general practice by 1st October 2018. The overarching principle of the initiative is to improve access to routine, bookable appointments in general practice so that patients find it easier to visit the GP at a time that fits in with daily life. The key components of this service are nationally mandated as follows: - Capacity – 30 minutes per 1,000 weighted population rising to 45 minutes as indicated by demand - Timing – Weekday evenings until 8pm and availability of appointments at weekends based on patient need. - Advertising – the service will be widely advertised but must include practice websites. - Delivery – delivered by practices individually or in networks. - Digital – use of digital approaches to offer a range of consultation types. - Deliverables – service model addresses identified local need. - Workforce – workforce to be made up of clinicians – ensuring access from and to other primary care and GP services (e.g. links with NHS 111). 39	Clarity TeamNet	Clarity TeamNet (https://clarity.cc.nz/teamnet) has been identified as the digital tool to enable the partnership development and collaboration between newly formed PCNs across Buckinghamshire. Clarity TeamNet provides a powerful and secure platform that includes all the tools for collaborative working designed to meet the complex and overlapping environment in Primary Care. Clarity TeamNet will be procured for a period of 2 years. It provides a common platform for PCNs to share meeting minutes, action and decision logs and use TeamNet's project management tool to facilitate the process of collaboration and sharing across and within PCNs. Using TeamNet, PCN meetings can change quickly in the NHS. Bucks CCG via Clarity TeamNet will be able to have direct and focused communications with the right people as well as keep track of the changes. Significant time efficiency will be created as it reduces reliance on emails and phone calls. Clarity TeamNet also has specialist tools such as risk management tools and the ability to request and collate submissions and questionnaires from practices which will assist Buckinghamshire CCG in their role to support PCNs. Clarity TeamNet portal for individual practices is also high as it helps save time, manage practice effectively and ease the path through CQC and other compliance inspections. 44	Covid 19: Immedicare LLP	Immedicare LLP currently provides 24 hour telemedicine support to 37 care homes across Buckinghamshire. Due to the unprecedented demands of the current environment created by COVID19, Bucks CCG are proposing to extend the contract with Immedicare LLP initially with 23 care homes and then rollout to 62 further which would ensure coverage across all care homes in Buckinghamshire for the duration of the pandemic. This will help in the provision of 24 hour clinical support and management into all care homes as a direct response to COVID 19. The total cost for 23 care homes is £240,960 for 12 months. It is proposed to commission: -Further 20 homes at a cost of £152,467 for 12 months -Further 19 homes at a cost of £120,351.20 for 9 NHE supported living homes at a cost c£438,224 for 12 months The service provision comprises: - Telemedicine clinical service including: i) Laptop, HD Webcam, call system ii) Installation services, technical & clinical training iii Telephone & video helpdesk support - Comprehensive SLA including on-site engineering visits - Clinical Lead to provide clinical governance and support to staff, which could be aggregated across all operational care homes as required The service is expected to: - Reduce unnecessary GP appointments and A&E attendance rates and - Reduce acute hospital admissions This is essential during Covid and beyond The total cost for the extension to 62 homes (care homes and supported living) for 12 months would then be £589,661 + VAT which (£624,051 is being requested here. This is for a 12 weeking approval for the renewal of the Away From My Desk (AFMD) software by a further 6 months. It is currently in use by Buckinghamshire GPs for home working during COVID. AFMD provides an encrypted remote connection to the desktop of a computer in the GP practice from the users home computer. This solution has been very effective during the COVID pandemic as it's relatively simple to configure and provides access to all the systems a GP requires. 34	Medacy Ltd (SNARO 484)	The Rheumatology department at Buckinghamshire Healthcare NHS Trust (BHT) currently see patients monthly on initiation of a group of drugs known as DMARDs and at least annually thereafter once stable. A survey of patients with established rheumatoid arthritis (RA), psoriatic arthritis and ankylosing spondylitis (AS) in the CCG, in particular during lockdown and virtual follow up consultation appointments resulted in no action. DMARDs require close monitoring through blood tests as there is a life threatening risk from side-effects. This is usually carried out in primary care under a shared care protocol with secondary care. Due to the pandemic and the pressure on primary care, a pilot scheme was developed with active support from primary and secondary care to introduce specialist Clinical Pharmacists employed by Medacy to provide assurance on DMARD monitoring and to relieve pressure on the GP and Rheumatology department's workload. With the arrival of Covid-19 data from the pilot showed and there is a need to extend the period of collection. The programme is one set up in response to the pandemic and the Vaccination Response and although it has been in place some months now the expectations of the programme continue to grow in scope and delivery. The contract will be for a limited period to ensure the programme is managed to have robust BI support capable of a multitude of functions including capacity and demand modelling, performance analysis and reporting. The skill set required to deliver the input required and listed above was not within the CCG / CSU and a full tender would not have been timely. Contracting with RKSS is therefore the best method. We understand the consistency of approach until we reach our next milestone in March 22 where by all 1st boosters will have been given and the next phase of the programme will begin. Part of the contract will be to ensure a clear 'handoff' to the CSU for this function including ensuring full capability
